

Projekt je sufinancirala Europska unija iz Europskog socijalnog fonda

## Poziv na predavanje pod nazivom

### "Sustainability of Built Environment: Education, Research, Practice"

U sklopu projekta *Razvoj visokoobrazovnih standarda zanimanja i standarda kvalifikacija za područje održive i zelene gradnje uz razvoj novog sveučilišnog diplomskog programa održive i zelene gradnje s naglaskom na mediteransko područje*, gdje je nositelj Sveučilište u Splitu, Fakultet građevinarstva, arhitekture i geodezije, predavanje će održati **prof. ing. Jan Tywoniak, CSc.**, s Građevinskog fakulteta u Pragu, pod nazivom "**Sustainability of Built Environment: Education, Research, Practice**"

Projekt je odobren u sklopu poziva za dostavu projektnih prijedloga *Unapređivanje kvalitete u visokom obrazovanju uz primjenu Hrvatskog kvalifikacijskog okvira*, kojega je objavilo Ministarstvo znanosti, obrazovanja i sporta, u okviru Operativnog programa "Razvoj ljudskih potencijala 2007.-2013." Sve informacije o natječaju možete pronaći na web stranicama [www.strukturnifondovi.hr](http://www.strukturnifondovi.hr)

**Datum i vrijeme:** 2. rujna 2016. (petak), s početkom u 10:00 h

**Mjesto:** Vijećnica, Fakultet građevinarstva, arhitekture i geodezije, Split

| Vrijeme       | Aktivnost  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| 10:00 – 11:00 | Predavanje | <p><b>Opis predavanja</b></p> <p><i>Description of activities at the Faculty of Civil Engineering in Prague and at the university research centre. Main part of lecture will be focused on results from applied research and development.</i></p> <p><b>Predavač</b></p> <p><i>Jan Tywoniak is professor at Faculty of Civil Engineering CVUT in Prague. He is a deputy head of the Department of Building Structures and member of scientific board of the faculty. In parallel, he works as a key researcher at UCEEB within the group Architecture and Environment. He is an expert in thermal performance of buildings and in building-energy concepts of buildings. Member (1997-2014 head) of technical committee for standardisation TNK43 Thermal performance of buildings at UNMZ. He is an author and co-author of technical standards. He represented Czech Republic in the CEN/TC89 committee. He is a deputy head of Czech Sustainable Building Society (CSBS iISBE Czech). He is involved in activities of International Energy Agency. He is a member of scientific board by publisher Franco Agnelli, Italy, and member of International Association of Building Physics (IABP). He was a supervisor of 8 PhD theses. Author of 4 books, co-author of teaching materials and more than 100 papers mainly at international conferences from scientific field thermal performance of buildings and energy demand of buildings.</i></p> |
| 11:00 – 11:05 | Pauza      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 11:05 – 11:35 | Predavanje |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
