

CV for Prof. Dr. Lidija Krstevska

Lidija Krstevska, Ph.D.,M.Sc, B.Sc, is a full professor in the Institute of Earthquake Engineering and Engineering Seismology - IZIIS, Ss. Cyril and Methodius University in Skopje, Republic of Macedonia. She is a professor in the subjects Experimental Mechanics and Dynamics of Structures at the international master and doctoral studies at IZIIS. Her main professional activities are related to experimental testing of structures on site as well as testing of scaled models, elements, structural components and equipment in laboratory conditions exposed to different types of dynamic loads, including earthquakes. She has participated, as principal investigator or co-investigator, in numerous international and domestic scientific projects and has published many original and scientific papers as author or co-author. She has supervised 4 master theses and 2 PhD dissertations. Currently, she is a head of the department: Laboratory for Dynamic Testing and Informatics at IZIIS.
