

Raspored predavanja Prof. dr. sc. Lidije Krstevska

17.05.2018.

- 9.15 – 11.00 Basic concepts of experimental mechanics and testing techniques
- 11.15 – 13.00 Dynamic in-situ testing of structures: Ambient and Forced vibration methods – theory and practical example

18.05.2018.

- 9.15 – 11.00 Theory of models – model types, advantages and limitations; procedure for shake table testing of scaled models
- 11.15 – 13.00 Application of experimental results in evaluation of seismic stability of structures
